Roadway And Private Area Lighting

Pictures, Descriptions, and Pricing

Revised October 2015

DELIVERY ENGINEERING (DE) LIGHTING OPTIONS FOR STREET AND PRIVATE AREA LIGHTING

Please note the following lights, poles, and prices are subject to change without notice. These photos provide you with the choices now available.

Please let your LE representative know which style light and pole you are interested in.

Note: Conduit installation remains the customer's responsibility.

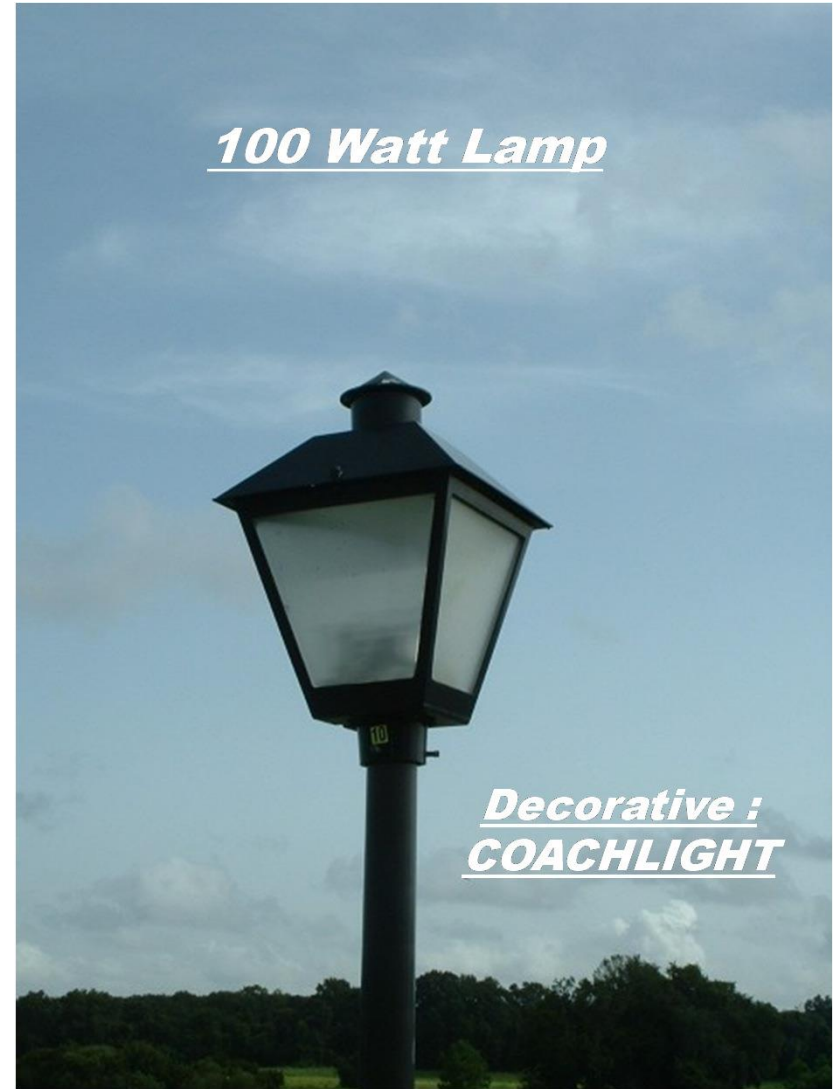

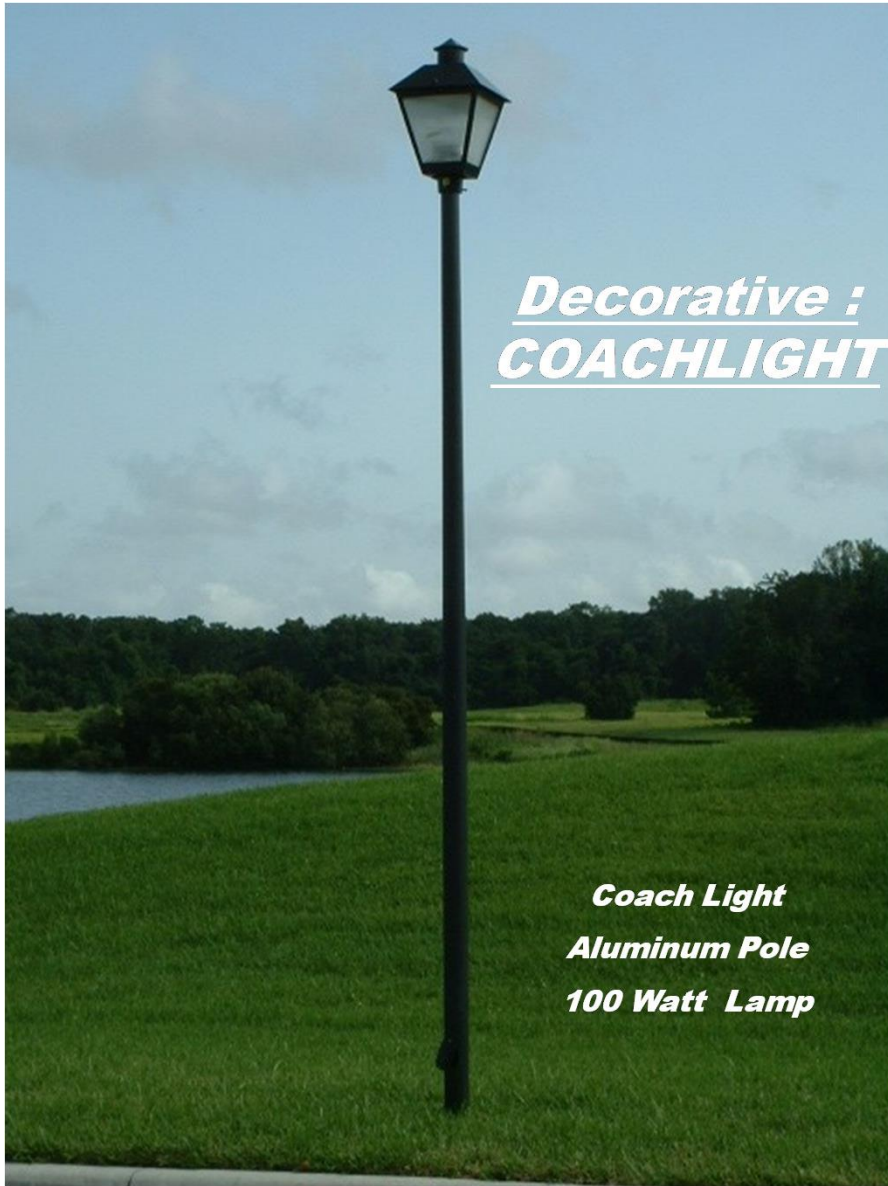

Lakeland Electric ~ Unincorporated Polk County and/or No Annexation Agreement Contract Lighting Policy

Page 1 of 1

- Subdivisions located in the Unincorporated Polk County and/or where there is not a City of Lakeland Annexation Agreement, the Developer is responsible to provide Lakeland Electric, in writing, the Lighting choices that are to be included with the LE Electric Distribution plan, or if LE installed lighting is not requested.
- The assigned Project Manager will design the lighting system utilizing Lakeland Electric's Standards with respect to the type of light and light pattern.
 - The developer may opt for additional lighting, such as: entrances, common areas, etc which will be subject to a **PAL* Billing Rate**. (See Attached Sheet).
 - The poles and fixtures designed for the primary purpose of lighting the roadways will be billed at the **Roadway Billing Rate**. (See Attached Sheet).
 - The developer may not opt to reduce the number of lights designed by Lakeland Electric, when chosen for the purpose of lighting the Roadway.
 - Lakeland Electric will install all lights at one time.
- The owner must sign a **three-year or five year** lighting contract prior to installation.
- The lights will be installed after the distribution work has been completed.
- All Underground conduit to be provided and installed by the developer.
- The monthly billing will begin upon light installation completion.
- For Polk County Lighting Taxing District Information and applications, contact the **Polk County Lighting Engineer at 863-534-6443**.
