<p>The <b>Suburban</b> light is popular with residential customers, as it evenly disperses light in all directions. It illuminates parking lots churches.</p>	<p>The <b>Directional</b> light is used primarily by commercial customers because it creates a floodlight effect. Used to illuminate specific object / area.</p>	<p>The <b>Roadway</b> light is used most often for lighting streets or parking lots.</p>

**Pole Costs:** If a utility is not currently at the site for mounting the light, Lakeland Electric has two types of poles available. There is no installation fee, but a monthly rental feed will be assessed. Pole site approved according to large utility vehicle access.

30 ft. Class 6 wood pole: PAL: \$2.12  
RDWY: \$1.84

30 ft. Type 1 concrete pole: PAL: \$4.17  
RDWY: \$3.27
