<p>The <b>Suburban</b> light is popular with residential customers, as it evenly disperses light in all directions. Also, it effectively illuminates parking lots or churches.</p>	<p>The <b>Directional</b> light is used primarily by commercial customers because it creates a floodlight effect. Used to illuminate a specific object or area.</p>	<p>The <b>Roadway</b> light is used most often for lighting streets or parking lots.</p>

Pole Costs: If a utility is not currently at the site for mounting the light, Lakeland Electric has two types of poles available. There is no installation fee, but a monthly rental feed will be assessed. Pole site approved according to large utility vehicle access.
